

Human-AI Co-Creation

10

OCT 2026

Human creativity rarely begins with precision.

In early visual ideation, people think through sketches, metaphors, sensations, emotions, and evolving fragments of intent. This workshop explores how **multimodal generative AI** can move beyond semantic correctness and become a **creative partner** for exploratory, ambiguous, and fluid human-centered creation — preserving human agency and authorship.

Call for Papers

Topics of interest include, but are not limited to:

- Human-centered GenAI models
- Collaborative multimodal AI
- GenAI for creative processes
- Multimodal representation and alignment
- Creativity-oriented HCI paradigms
- Cognitive foundations of creativity
- Human-centric benchmarks and evaluation
- Novel applications for creativity
- Ethical GenAI in creative domains
- Interactive and iterative creation tools

Invited Speakers

Chen Change Loy
Nanyang Technological
University

Mira Dontcheva
Adobe Research

Fabio Pellacini
University of Modena
and Reggio Emilia

Yuhui Yuan
Canva

Important Dates

Jun 26, 2026
Paper submission deadline

Jul 31, 2026
Camera-ready submission

Jul 20, 2026
Acceptance notification

Oct 10, 2026
Workshop day · ECCV 2026
